## Speaker

### **Lindsay Carroll, BS, CVT, VTS (O)**

Lindsay started out as an assistant at a mixed animal practice where her mom was a veterinary technician. It continued to spur her interest in veterinary medicine and she continued to work during the summer breaks from college. After completing her bachelor's degree in Animal Science from Oregon State University, she worked in a small animal practice for a few years before moving to Colorado. She changed paths and joined a specialty hospital where she was a surgical and anesthesia technician. After a few years there, she finally landed in oncology at Colorado State University. She has been there for 7 years now, with the last two years in the oncology clinical trials department. In her free time she loves playing grass volleyball, hiking, baking and spending time with her cat, Bosleigh.
